Why autonomous institutions introduce our high security Marksheets and Certificates?

Wide spread use of digital tools has made counterfeiting and forgery very easy. Now, digital scanners, image grabbers and colour printers are widely used to counterfeit high value documents such as title deeds, agreements, university degree certificates, mark-sheets, ID cards etc. Even currency notes with sophisticated security features are easily attacked and Marksheets and University Certificates are also not spared.

Once it was the responsibility of the Universities to issue both the Certificates and the Marksheets. Security and authentication of these critical documents were also the responsibility of the universities. However, after the introduction of Autonomous Institutions, the responsibility of issuing Marksheets got shifted from the University to the Institution and now the responsibility of any possible counterfeiting or forgery will have to be handled by the Institution itself.

University Certificates and Marksheets are core prestigious documents in the life and growth of a person and these documents must remain intact for a lifetime. Job aspirants now travel across the globe and this adds complex threads to the security requirements of University Certificates and Marksheets. So, a possible event of counterfeiting or forgery of Marksheets or Certificates takes lots of sensitive dimensions, especially in an age of high media activism, and can kill the brand image of a reputed institution. On the other side, many recent happenings across the globe and a widely anticipated 'Digital Catastrophe' pose several questions against the security and long-term reliability of Cloud based data storage. Hence for reputed Autonomous institutions, secure deliverance of Marksheets is as important as providing quality education itself.

Light Logics – who we are?

Light Logics is India's leading Laser Holography technology company. The Company has the rare distinction of having awarded two consecutive India Innovation Gold medals, jointly instituted by the Lockheed Martin – USA, (popular for their F16 fighter jet and many high end strategic devices and systems), Indo-US Science and Technology Forum, University of Texas at Austin, Department of Science and Technology – Government of India and the FICCI.

Light Logics Solutions

Our new generation Certificates and Marksheets involve effective fusion of photonics, ICT and security printing technologies and these address all aspects of digital counterfeiting, done by both organised and unorganised counterfeiters. Our advanced proprietary features, elegant design and adherence to international security standards in production - right from design to delivery, make the Certificates and Marksheets unique and hence it is virtually impossible to effectively counterfeit our documents and certificates even with advanced digital tools. Our secure software for in-house student data printing addresses all practical aspects being faced by an institution. Secure data and material handling, multilevel verification, secure data storage etc. are other key aspects. All these contribute to better branding, cost effectiveness, increased income, increased student satisfaction and better branding.

We have over two decades of globally reputed experience and exposure in this avenue. Our continuous R&D and innovation in Document Security always keep us ahead of time and we are widely invited in almost all leading international Document Security conferences, for presenting our latest innovations. Our experts were involved in the design of the new generation Certificates of the University of Kerala, University of Calicut, Kerala Agricultural University and a set of core documents for governments in India and abroad.

A few of the reputed Autonomous Institutions who use our expert system and high security Marksheets/ documents for totally in-house Marksheet printing: SB College, Changanacherry, Farook College - Faruque, Christ College - Iringalkkuda, Assumption College – Changanachery, St. Theresas College – Ernakulam.

A few of our other reputed document security clients: Adani Vizinjam Ports – Trivandrum, Technopark – Trivandrum, Keltron – Trivandrum, Government of Assam, Manipal Press - Manipal etc.
